

4½. Symposium on Pediatric Hand Surgery Paris, Saturday October 9th, 2021

Dear colleagues

We look forwards to meeting you in an old-fashioned on-site meeting at Paris in October. You can expect excellent talks from our motivated faculty and inspiring discussions following your abstracts. And yes, finally we have an opportunity for informal discussions and exchange during the coffee-breaks.

It is very short notice for you and for the organizers. We have to compromise on financial aspects and formalities. We therefore plan a rather informal gathering of enthusiasts. We keep cost as low as possible, hoping to encourage participation of trainees.

We love the provisional program: A congenital session about little fingers and a session on multiple aspects of wrist pain. It will be mostly invited talks and few abstracts specifically on these topics.

Paris is accessible by TGV from most European cities and is always worth a weekend trip. Looking forwards to meeting you soon!

Daniel Weber

Stéphane Guéro

Organization

Supported by	PULPe (Paediatric Upper Limb Project Europe) www.PULPe.eu
Faculty	Stéphane Guéro, Wiebke Hülsemann, Tobias Laurell, Christianne van Nieuwenhoven, Bran Sivakumar, Gill Smith, Daniel Weber
